Art Unit: 1724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-92 and 99-104, drawn to a product or method of making a product containing bromine or chlorine, classified in class 423, subclass 462.
  - II. Claims 93-98, drawn to a method for treating water, classified in class 210, subclass 764.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be practiced with another materially different product; that is, a method for microbiological control of water from an industrial water system can be practiced with another product containing a biocidal agent other than the product of invention I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
